Work Experience

AsamTech   **Tehran, Iran**
Senior Software Engineer   *December 2019 - Present*

- Developing new infrastructure for Frontend/Backend projects and leading a small 5 developer team.

- Reviewing code of the other developers in the team.

- Technologies: React.js, Next.js, Angular 8, Node.js, React Native.

Takhfifan   **Tehran, Iran**
Senior Front-End Developer   *September 2018 - December 2019*

- Leading a team of 4 Frontend developers to maintain existing Backbone.js web application.

- Collaborating with Product Managers, Product Owner, and Scrum Master on a daily basis.

- Reporting directly to the CTO about important Frontend issues or decisions.

- Increased the load speed of our existing web application and reduced the DOM hierarchy.

- Architected a new structure with Vuejs as a UI framework and Vuex as a state management library.

- Using TDD approach and Jest for the unit tests and Cypress for the UI tests.

Artatel   **Tehran, Iran**
Front-End Developer   *July 2017 - August 2018*

- Developing a structure of the VAS/VOD dashboards and a landing page generator for the marketing team.

- Increased standardized structure for the dashboard's future development processes by using Angular 4.

- Used React Native, Redux for developing the MVP version of the startups' mobile applications.

- Decreased marketing costs by capturing users' behavior and R&D on marketing landing pages.

Fanava DP   **Tehran, Iran**
Front-End Developer   *December 2016 - June 2017*

- Developing UI parts of the ERP and CRM systems using AngularJS in a component-based structure.

- R&D on how to migrate to the new UI Framework/Library.

KaroonIT   **Tehran, Iran**
Front-End Developer   *January 2015 - November 2016*

- Developing a responsive UI with VanillaJS and JQuery, Bootstrap for the websites and platforms dashboards.

- Developing Hybrid mobile applications with Ionic framework and Apache Cordova.
